

powered by design

At AVIN we believe that our production record and farsighted management put us in a position to be a preferred supplier in the industry. We seek to improve the way we operate, not only to enlarge our customer base, but to keep down costs and through creative and innovative design, work with you so your successes are more achievable. Your satisfaction is our mission. Being a front row player in the market is our vision.

Knowing that having advanced technology makes it all possible, we are committed to using the very best of manufacturing equipment available, such as having a very capable pick & place machine for high speed accuracy, flexibility, reliability and production stability, a precision selective wave soldering machine for mixed technology placement allowing us to maintain consistency, accuracy, repeatability and thus reliability. We also have many other associated pieces of equipment which are also well maintained and regularly serviced to support efficient productivity.

With a highly motivated staff and top level expertise, we know that together we can meet the challenges ahead of us.
